

Virtual Mathathon

<http://bit.ly/virtual-mathathon>

The Boerdijk-Coxeter Helix, formed purely out of regular tetrahedra, not discovered until the 1950s.

What: Free, online, cooperative hackathon/mathathon to attack a range of “open” problems in geometry related to robotics and structures.

When: Fri, Nov 30, 2018, 8:00 PM – Sun, Dec 2, 2018, 5:00 PM EST

Where: Everywhere! [goto website for Zoom/Slack links]

Who: Mathematicians, computer scientists, roboticists and anyone else who loves math and has advanced high school math skills or above.

Why: It'll be fun to work on unsolved problems with math aficionados from around the world!
